THIS IS UNEVALUATED INFORMATION

1. The electric power station in Kucove is a thermal station and has three Tosi motors, one of 1200 h.p. and the other two of 600 h.p. each.
2. Between 1946 and 1948 new electrogenic groups (obtained from UNRRA) were mounted, but soon had to be replaced because of the lack of fuel and skilled personnel. At the beginning of 1949 they were replaced by new ones, model Dutz, with a 650 h.p. motor, and they went into operation in August 1950. Another similar group was also mounted and put into operation at the end of 1949.
3. The transformer and the entire electrical network in the sector of Kucove are in a very good state of repair. The transformer has 12 transformation compartments.
